

PNM Alters Tree-Trimming Plan Following Community Input

PNM has altered its tree-trimming plan for the Fort Marcy Park area after discussions with the local community.

PNM will proceed with the following plan:

- Trimming of trees will be conducted as done in previous years.
- The removal of dead trees and those situated directly beneath power lines will continue as scheduled.
- PNM will maintain its tree monitoring practices established in previous years. If any trees are identified as being in decline or presenting an imminent hazard, PNM will contact the City of Santa Fe to discuss further measures.
