

Initial Two-Mile Pond Report Released by City of Santa Fe

The City of Santa Fe Public Works Department has released the initial Two-Mile Pond Report after monitoring by contractor John Shomaker & Associates, Inc. (JSAI).

The assessment evaluated the condition of the wetland using both remote and field-collected data.

These monitoring efforts help to evaluate the impact of changes in stream flow conditions and track the health of the riparian system, which is crucial for maintaining biodiversity and ecological balance.
